

The Supply Chain Resiliency Technology Developed by the Data Science Lab

Understand the
financial impact
on the business

**Look around the
corner** to identify the
risk

Continue to reassess risk
(TTR, TTS, PI)
– leverage digitalization

“If you can do that analysis across your value chain, you can learn how to prioritize and manage risk.”

Hau Thai-Tang, Ford Exec VP for Product Development and Purchasing

“Leverage Digitization.. You can automate these capabilities... and use concepts such as TTS and TTR, it will help you keep your business and growth healthy and keep your customers and shareholders happy. ”

Annette Clayton, CEO and President of Schneider Electric NA

“The technology developed with MIT’s Data Science Lab has helped us better identify our supply chain vulnerabilities and deploy proactive mitigation strategies to maintain stable operations and exceptional customer service levels.”

Mike Winkler, DENSO Vice President and Division Head of North America Purchasing

“A Game Changer.”

Chief Procurement Officer, Large Global Consumer Packaged Good Company
